

# **Memorandum of Meeting of International Organizing Committee of International Conference on Magneto-Science**

**Oct. 15, 2013, Bordeaux, France**

**(by Ozeki)**

We discussed the following subjects and decided as described below.

## **Subjects**

### **1. Next ICMS (ICMS 2015)**

ICMS 2015 will be held in Japan. The place, date and host person for the ICMS 2015 will be determined after discussion at the Magneto-Science Society of Japan.

(Moreover ICMS 2017 was discussed briefly. Prof. Hore was recommended as a candidate of a host person for the ICMS 2017.)

### **2. Vice Chairperson**

The members agreed that a Vice Chairperson is necessary to keep continuously activities of the IOC of ICMS. Dr. Eric Beaugnon was elected the Vice Chairperson.

### **3. IOC and IAB Member's term (including Chairperson)**

A term is two years of the beginning of year to the end of next year.

(i) IOC member's term is a term or two terms when "a successive reappointment" is allowable. Chairperson's and Vice Chairperson's term each also are a term. An IOC member at second term may be elected Chairperson and Vice Chairperson. In such cases, maximum terms are three and four terms, respectively.

(ii) IAB member's term is open. (self-reported)

### **4. Renewal of IOC and IAB members**

The renewal of IOC and IAB members should be done according to the following guideline.

- (1) The candidates have made an important contribution to Magneto-Science field and are active in the study of this field.
- (2) The candidates have ever participated at the ICMS so-far.
- (3) The members are limited to be one person from one institute/laboratory/college.

There are two member renewal:

- (i) Prof. Tanimoto should become an IAB member.

(ii) Prof. (Emeritus) James Torbet should be continued.

The renewal members are listed below.

## **5. How to develop Magneto-Science (Free discussion)**

# We confirmed that ICMS should be held every 2 years.

# We continue to think about the unification between ICMS and MAP?

# Any international exchange and collaboration program in the Magneto-Science Community, especially for young researchers should be progressed.

\*\*\*\*\*
